- » **Migration** from the ISDN network switch-off without replacing your existing PBX

* Fair use policy applies.

Designed, Built and Delivered by Sangoma Technologies.

Sangoma have been guardians of the FreePBX project for more than a decade and brings high quality, cost effective SIP Trunking to your FreePBX server, PBXact system or virtually any IP or TDM PBX. SIPStation SIP trunks are not only delivered by Sangoma, but they are also backed by the same R&D and support staff that brought FreePBX, PBXact, Sangoma IP Phones, Gateways and Session Border Controllers. You need only one place for purchase and support solutions for your business communications needs, giving you peace of mind and time.

Save Money on Your Monthly Phone Bill

Reduce your phone costs in minutes and deliver a higher standard of service to your business by replacing traditional phone lines and ISDN lines with SIPStation SIP Trunking.

Save thousands off your phone bill with unlimited calling plans to UK fixed and UK mobile numbers.

Simplify your communications network by using a single broadband data connection.

Pay Only for What You Need

With SIP Trunking, no need to purchase or wait for fixed lines ISDN capacity. Benefit from our monthly unlimited calling plans for predictable expenses and add or drop channels as needed.

Select from month-to-month, 12 month or 36 month plan and either unlimited or if you prefer to pay for what you use, then we offer a metered service too. Because at Sangoma we like to give you the choice that best suits your business.
